DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5, 10-14, 16 and 20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kim et al. (United States Patent No. 6,565,355).

Kim et al. disclose a mounting aid comprising a resilient tensioning device in the form of an o-ring 3, and a sheet strip 1. The sheet strip includes an abutment portion for positively engaging the bracket, a holding portion 2 for fastening the tensioning device to the sheet strip to secure the sheet strip to the bracket, and a lug extending away from the holding portion (see figure 1a). The abutment portion includes an edge 16 and a tongue (see figure 1b). The lug includes a plurality of projections 5 (see figure 3) and includes a widened end (see figures 2a-2b).

Allowable Subject Matter

Claims 4, 6-9, 15, 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3732
